

Reasons to choose Bio Sculpture for your nails.

Bio Sculpture Gel is a nail hardening treatment: strong, durable but flexible.

Permanent color on toenails prevents unsightly chipped and worn nail polish; ideal for holidays.

Bio Sculpture Gel does not damage the natural nail plate, but enhances the natural nail. Bio Sculpture Gel is thin and natural looking.

No excessive buffing will occur before or after applying Bio Sculpture Gel.

Bio Sculpture Gel is fast and easy to apply -- self-leveling.

Bio Sculpture Gel is non-porous and does not cause fungus or mold.

Permanent nail color, 100 colors to choose from, also available in French.

Temporary color change on permanent nail color can easily be done by applying one or two layers of Bio Sculpture or regular nail polish.

Removal of permanent nail color is fast and is done without causing damage to the natural nail by using a specially formulated Soak Off Solution.

Clear or Color Gel can be used on natural nails as an overlay on regular or French tips. It is also used to build Gel Nail Sculptures without the use of tips, glues, resins or primers.

Temporary Color Polish can be removed with specially formulated Cleanser, to return to the original permanent Gel Color.

Bio Sculpture Gel dries instantly under a UV Lamp. No waiting to let nail polish dry.

Bio Sculpture Gel is easy to care for at home with a Home After Care routine; thus regular visits to the salon are cut down tremendously.

Bio Sculpture Gel will not chip.

Color Gels have matching polish and lipstick.

Bio Sculpture Gel -- Clear, French or Color increases the quality of regular manicures and pedicures.
